## How to clear your browser cache
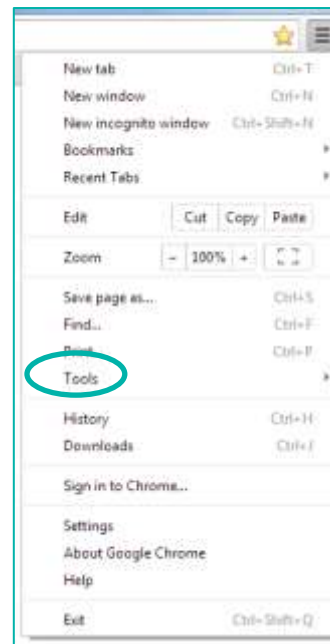

| How to clear your browser cache	
Context: An over full browser cache may cause your STAR session to run slowly or stop working. When using STAR, you should clear your browser cache periodically. A web cache temporarily stores web pages and images to reduce bandwidth usage and server load. If you are a regular eMap or STAR user, the cache in your browser may fill quickly. The following instructions are for clearing your cache completely.	
Click on the 'Customise and control Google Chrome' button	
Select the 'Tools' option .	

VICTORIA State Government | Environment, Land, Water and Planning

Select 'Clear browsing data'.	
Tick the 'Cached images and files check box' and select *the beginning of time,* to clear your cache completely. Click the Clear browsing data button.
