

First Name

Helen

Last Name

Hodgkins

What organisation are you from?

Private citizen

What do you think are the best value actions listed in the statement that are likely to help improve future air quality?**How would you build on or vary these actions?****Do you have any suggestions for further actions?**

The EPA licences need to be strengthened for air emissions. There is no drive by large industry to constantly improve their emissions. It is hard for the EPA to take action when there is a breach of licence air emissions.

Are there any air quality actions you believe should be avoided? Why?**Are there particular areas of air quality (either pollution sources or geographic regions) you think the government should target for improvement? Why?**

South west Victoria, particularly Portland

Are you able to provide any data or information that will help government assess the feasibility and cost-effectiveness of air quality management actions?**Do you have other suggestions on how to secure a clean air future?**

We need to reduce reliance on cars. Public transport needs to be expanded and more reliable so people can rely on it. The government needs to cost registrations for vehicles on the amount of emissions they produce ie. engine size, age etc.
