We acknowledge and respect Victorian Traditional Owners as the original custodians of Victoria's land and waters, their unique ability to care for Country and deep spiritual connection to it.

We honour Elders past and present whose knowledge and wisdom has ensured the continuation of culture and traditional practices.

DEECA is committed to genuinely partnering with Victorian Traditional Owners and Victoria's Aboriginal community to progress their aspirations.

## Legislative context

The *Flora and Fauna Guarantee Act 1988* (FFG Act) establishes a legal and administrative structure to enable and promote the conservation of Victoria's native flora and fauna.

Species, communities of flora and fauna and potentially threatening processes (PTP) are assessed by the Victorian Scientific Advisory Committee and recommended to the Minister for Environment and Minister for Agriculture for inclusion in the following lists:

- Threatened List
- Processes List

These lists can be accessed here: [Flora and Fauna Guarantee Act Threatened List \(environment.vic.gov.au\)](https://environment.vic.gov.au/Flora-and-Fauna-Guarantee-Act-Threatened-List)

Once an 'item' (species, community or PTP) is listed on the Threatened List or Processes List, an action statement must be prepared.

## What is an action statement?

Action statements are one of several legislative tools used to inform conservation and investment decisions to support the recovery of threatened species and communities as well as manage and mitigate PTPs.

Action statements are prepared with information sourced via expert elicitation, consultation and published literature. Information has also been drawn from existing databases, including the Victorian Biodiversity Atlas, decision support tools, conservation status assessments and current statutory conservation documentation such as national Recovery Plans and Conservation Advice.

An action statement must set out actions that are intended to conserve or manage an item and document actions that have been undertaken in the past. In addition, action statements have been designed to include specific information on the listed item including the conservation assessment status, threats, conservation objectives and links to information sources including the Department of Energy, Environment and Climate Action's (DEECA) decision support tools and resources to assist in the submission of reporting and monitoring data.

## How can I contribute to the preparation of action statements?

The FFG Act emphasises the importance of cooperative approaches to biodiversity conservation, recognising that all government agencies and the community can participate in the conservation effort.

To ensure action statements are accurate and provide valuable information to support on-ground action, you can submit information to support their preparation here: [threatened.species@deeca.vic.gov.au](mailto:threatened.species@deeca.vic.gov.au)

## Annual preparation list

Over the 2023-2024 financial year, the Victorian Government is committed to preparing more action statements than have ever previously been published, with a focus on threatened plants, which make up the majority of the FFG Threatened List. In addition, an action statement for one of Victoria's faunal emblems, the Leadbeater's Possum, (*Gymnobelideus leadbeateri*) will be prepared this year to complement the national Recovery Plan. A recently listed PTP for Poisoning of Native Wildlife by Anticoagulant Rodenticides will also be prepared.

The Action Statement Preparation List 2023–2024 includes 1020 species and one PTP. Of the species, 217 are Critically endangered (CR), 642 Endangered (EN), and 161 Vulnerable (VU), as outlined in Table 1.

**Table 1. Listed items for action statement preparation.**

Item type	#	CR	EN	VU
Mammals	1	1	-	-
Vascular plants	1008	213	636	159
Non-vascular plants	11	3	6	2
<b>SPECIES TOTAL</b>	<b>1020</b>	<b>217</b>	<b>642</b>	<b>161</b>

# Action Statement Preparation List 2023-2024

The following species and potentially threatening process will have an action statement prepared for publication in 2023-2024.

## Potentially Threatening Process

### Listed Process

Poisoning of Native Wildlife by Anticoagulant Rodenticides

## Mammals

Common Name	Scientific Name	Category of Threat
Leadbeater's Possum	<i>Gymnobelideus leadbeater</i>	Critically endangered

## Non-vascular plants

Common Name	Scientific Name	Category of Threat
Arc Moss	<i>Hampeella pallens</i>	Critically endangered
Brown's Mitre-moss	<i>Calyptrochaeta brownii</i>	Endangered
Crisped Mitre-moss	<i>Distichophyllum crispulum</i>	Endangered
Grey Pouchwort	<i>Acrobolbus cinerascens</i>	Critically endangered
Macromitrium	<i>Macromitrium ligulaefolium</i>	Endangered
Madeira Moss	<i>Echinodium hispidum</i>	Vulnerable
Marsh Tree-moss	<i>Climacium dendroides</i>	Critically endangered
Nerveless Pocket-moss	<i>Fissidens dealbatus</i>	Endangered
Sheath Moss	<i>Eucamptodon muelleri</i>	Endangered
Tall Apple-moss	<i>Bartramia mossmaniana</i>	Vulnerable
Water Pocket-moss	<i>Fissidens strictus</i>	Endangered

## Vascular plants

Common Name	Scientific Name	Category of Threat
Allied Bent-grass	<i>Deyeuxia affinis</i>	Critically endangered
Alpine Blown-grass	<i>Lachnagrostis meionectes</i>	Endangered
Alpine Bootlace Bush	<i>Pimelea axiflora</i> subsp. <i>alpina</i>	Vulnerable
Alpine Boronia	<i>Boronia algida</i>	Vulnerable
Alpine Bush-pea	<i>Pultenaea fasciculata</i>	Endangered
Alpine Buttons	<i>Leptorhynchus squamatus</i> subsp. <i>alpinus</i>	Endangered
Alpine Colobanth	<i>Colobanthus affinis</i>	Endangered
Alpine Crane's-bill	<i>Geranium brevicaule</i>	Endangered
Alpine Everlasting	<i>Ozothamnus alpinus</i>	Endangered

Common Name	Scientific Name	Category of Threat
Alpine Fen-sedge	<i>Carex hypandra</i>	Critically endangered
