

I thought I was in Indonesia last week. I am used to Australia emotional attacks on such countries of Air Pollution ,and here we are DOING THE SAME THING!!!

Worst of all, we the public were told that "It was necessary burn off to reduce fires in summer" .
LIES LIES AND MORE LIES

The majority of 119 fires were from LOGGING burn off. 77 FIRES which, I am informed are much more dense and polluting.

The FACT that this was done under the umbrella and COORDINATED with LEGITIMATE Fire Authority burn off is DESPICABLE.

Also what use is the EPA if it is hogtied by Big Business?

Give it some teeth, INDEPENDENT teeth.

I am so saddened by yet another failure in TRUE, FOR THE PEOPLE government.

First, criminally negligent banks get a TAX HANDOUT...now this.

RIP The land of the fair go

Yours sadly

Margaret Kennedy
