

VBA – Editing Site Details

How to edit existing sites in the Victorian Biodiversity Atlas

This is a basic step by step guidance document to help you edit existing information relating to the species records you submitted to the VBA.

Tips

Throughout the VBA each window has a **?** in the top right hand corner – this is window-specific help that will provide further details about how to complete the fields.

Make sure that you have allowed pop-ups from your browser (you will need to allow these from the VBA site)

Also, throughout the VBA fields marked with a red dot (●) are mandatory fields and must be completed. The fields marked with a yellow dot (●) are conditional - if you complete one you must complete the others.

With the VBA you are able to see and edit all the data you have contributed, even if it has not yet been published (i.e. it is still in draft form or was not confirmed by an Expert Reviewer).

If you notice an error in the site details or taxa recorded, or you have received a [Further Information Request](#) Letter from the VBA there will be a comment from the relevant Expert Reviewer about any additional information required.

The Letter will highlight the Survey ID (or General Observation ID), Site Name and the species record that has been reviewed.

1. Visit VBA (<https://vba.dse.vic.gov.au/vba/>) and Login using your Login Name & Password.
2. Navigate to the Data Entry section in the top left of the Welcome page and then select [My Projects](#) (or [My General Observations](#)). From here you have access to all the projects you are associated with and can search for specific surveys (or general observations) using the Survey ID field: enter the relevant Survey ID then click on Search My Projects (see below).

The screenshot shows the VBA Data Entry interface. At the top, there is a navigation bar with 'Data Entry' and 'Search' dropdown menus, and a user welcome message 'Welcome Test Tester' with links for 'Home', 'My Detail', 'Help', and 'Logout'. Below this is a sidebar with a dropdown menu for 'My Projects', 'My General Observations', and 'My Sites'. The main content area contains a form with fields for 'Project Name', 'Organisation', 'Start Date', 'End Date', 'Project Personnel', and 'Survey Name'. A 'Survey ID' field is highlighted with a red box and a red arrow pointing to it. Below the form are buttons for 'My Projects' and 'All Projects'. At the bottom, there is a table with columns for 'Project ID', 'Project Name', 'Status', 'Start Date', 'End Date', 'Last Modified', and 'Expedite'.

| Project ID | Project Name | Status | Start Date | End Date | Last Modified | Expedite |
|------------|--|------------|------------|----------|---------------|----------|
| 2676 | Misc AWW surveys from the 2000s | Publish... | 01/01/1900 | | 09/01/2014 | |
| 3561 | VBA Help submissions of general observations | Publish... | 01/01/2013 | | 25/11/2013 | |

VBA – Editing Site Details

- To view the survey sheets of the relevant project use the notepad symbol (highlighted above). Then select the relevant survey in the project (or general observation) by double-clicking on the survey (or clicking on the magnifying glass symbol) with the matching Survey ID number. This will open the survey screen.
- To edit site details click the [Site Detail and Map](#) button. From the Site detail and map screen you can edit any of the site details.
- If you need to move the site to its correct position you can either plot the position directly on the map or type in the coordinates:
 - navigate to the correct position on the map, click [Plot](#) and click on the map OR
 - type the coordinates into the [Point Information](#) section of the screen, click Validate Location (this will reposition the map and zoom in to the new point location so you can double-check that it is plotting where you expect).
 - When the point is displayed in the correct position and you are happy with the Site Name, Locality Description, Accuracy etc, click [Save](#).

The screenshot displays the 'Survey' application interface. The top section, 'Main', shows the 'Survey Method and Results' tab with a 'Primary Discipline' of 'Terrestrial fauna'. Below this is the 'Site Description' section, which includes fields for Site ID (674401), Site Name (Two Bays Walking Track), Latitude GDA94 (-38.504), Longitude GDA94 (144.8956), and Locality Description (Cape Schanck). A button labeled 'Site detail and map' is highlighted with a red box. The 'Water Body' section contains dropdown menus for River Basin and Water Body Name. The 'Survey Information' section includes fields for Survey ID (1018268), Survey Name (Two Bays Walking Track), User Reference, Start Date (08/11/2013), End Date, Date Accuracy, and Monitoring Protocol. The bottom section, 'Site detail and map', features a map of Cape Schanck with a red dot indicating the site location. A green dot on the map is highlighted with a red box, and a red arrow points from the 'Plot' button in the form to this dot. The 'Point Information' section is also highlighted with a red box, showing fields for 'Was GPS Used', 'Location of the coordinate' (Centre), 'Coordinate Format' (Lat,Long - DD), 'Datum' (GDA94), and 'Latitude' (38.4918). Below this are buttons for 'Validate Location', 'Convert Coordinates', 'View', 'Save', 'Restore', and 'Upload'. A table at the bottom of the form shows the current coordinates: Latitude -38.4919, Longitude 144.8925, and Datum GDA94.

VBA – Editing Site Details

NOTES:

Unless the survey has a Status of Draft, you will need to enter a reason for why the site is being edited which will be forwarded to the VBA Administrator for assessment and approval prior to the system accepting the change(s).

If there is more than one survey associated with the site you want to move the VBA will prevent you from saving any edits and will tell you to contact the VBA Administrator. In this instance, please email vba.help@delwp.vic.gov.au with the Survey ID(s), required change(s) and a reason for the requested edit. In cases where it is not appropriate to edit an existing site, a new site can be created and linked to the existing survey by clicking **Edit** on the Survey screen and clicking **Create New Site** from the Site Description section (see below). Complete the required fields, click Save, and Close.

The screenshot displays the 'Survey Method and Results' form. The 'Primary Discipline' is set to 'Terrestrial fauna'. The 'Site Description' section includes fields for Site ID (652936), Site Name (Chaim Court Bushland), Latitude GDA94 (-37.8077), Longitude GDA94 (145.209), and Accuracy (10 metre(s)). A 'Create New Site' button is highlighted. The 'Water Body' section has dropdown menus for River Basin and Water Body Name, and a 'Create New Water Body' button. The 'Survey Information' section shows Survey ID (1018268), Status (Draft), Survey Name (Two Bays Walking Track), Start Date (08/11/2013), and End Date. The bottom of the form features buttons for 'Survey Report', 'Save', 'Save & Close', 'Delete', 'View', and 'Close'.
