

Victorian Landcare Grants

The Victorian Government's Landcare Grants support Landcare and environmental volunteer groups and networks to deliver on-ground works, education and capacity building projects to protect and restore the environment.

2024 Outcomes*

244 Projects delivered outcomes that include protecting threatened species and habitat, revegetating and controlling weeds, reducing rabbit numbers and engagement and education to connect communities with nature

Value for money the Victorian Landcare Grants leveraged **\$5.2 million** (2023 funding) through in-kind volunteer and staff hours, project support and financial co-contributions, on top of the **\$3.95 million** invested by the Victorian government

25,587 people participated in 1008 community events e.g. workshops, field days, and demonstrations delivered as part of grant projects

405 Artificial habitats or nest boxes installed for species such as gliders, owls and phascogales

* total figures include projects funded in previous rounds, but completed in 2024

Biodiversity 2037 Plan

21,073 Ha of land improved (10,416 MCGs) including:

415 Ha of habitat protected by **111 km** of fencing

411.3 Ha Revegetation

14,820 Ha Herbivore Control

5,428 Ha Weed Control

Note: drought and bushfires impacted some planned on-ground activities in 2024
